SCORE IMPROVEMENT SYSTEM FOR THE **SAT***

Practice Tests

Practice Tests

THE FIRST STEP TO SCORE IMPROVEMENT

The Pre-Test section of the Practice Tests module includes a series of questions on each of sixteen Math and Verbal subject areas found on recent SAT* exams. Upon your completion of the Pre-Test, the program provides a complete analysis of your performance, indicating what areas to study in order to improve your score.

Practice Test One is a simulated SAT exam timed and administered by the program. The program then scores the test on the '800' scale to give you an idea of how you would have done on an actual SAT exam. With Practice Test One you become familiar with the exam format, test your understanding of the subject areas reviewed after the Pre-Test, and begin to practice test-taking strategies.

Practice Test Two, taken after studying specific subject areas, ensures your familiarity with actual exam format and measures your improvement on the same '800' scale. Practice Test Two completes the thorough, intensive testing program of the Practice Tests module. The results are: test-taking skills, understanding of specific SAT subject areas, and confidence that you will maximize your scores.

ALSO AVAILABLE: MATH AND VERBAL MODULES

The Hayden Score Improvement System includes Math and Verbal modules which provide tutorials, drill, and analysis for each topic area of the SAT.

For the first time, a computer-aided instruction system, developed and tested in high schools across the country, significantly enhances the learning process needed to improve SAT scores. The unique system:

- Displays all material on the screen of your computer — no need for constant referrals to a manual or text.
- Uses tutorials, also totally on-screen, to explain not only the correct answer to problems, but also the best way to attack other problems of the same general type.
- Facilitates quick and easy access to any section of a module using the on-screen function keys.
- Provides the most complete and substantial score-improvement software available today.

THE MATH MODULE

- The **Algebra Section** provides instruction and practice in solving the entire range of algebra problems of the types found on the SAT — linear and literal equations, systems of linear equations, quadratic and radical equations, and reducing fractions.
- The **Geometry Section** provides instruction and practice in solving problems involving angle sums, equality of angles and sides of triangles, parallel lines, angles of a circle, the Pythagorean Theorem, special triangles, perimeters, areas and volumes. All figures needed to solve the problems are illustrated on the screen.
- The **Quantitative Comparisons and Word Problems Section** covers the remaining areas in the Mathematical section of the SAT, including quantitative comparisons, fractions and decimals, percentages, ratios and proportions, sequences, graphs and word problems.

THE VERBAL MODULE

- The **Vocabulary Section** provides a thorough review of antonyms, analogies and sentence completions, as well as an on-screen dictionary of 1000 words.
- The **Reading Comprehension Section** offers strategies and practice in reading passages and responding to questions about the material just read.

COUPON

HAYDEN

SOFTWARE

10 POINTS

The Hayden HeadStart Program. An easy way for your school to get free computers, peripherals, accessories and software.

Collect these special coupons. They come inside every box of Hayden educational software. Give them to your school together with your store receipt. When your school's collected enough coupons, we'll redeem them for free software, diskettes, KoalaPads™ joysticks, even a complete Apple™ IIe computer! We have a catalog showing the premiums available. For a free copy, have your school write or call Hayden Software as indicated below.

Schools: To register as a Hayden HeadStart School, and to receive the Hayden HeadStart Catalog and HeadStart Kit, write to Hayden Software on your school letterhead. Include your school's name, your school's system (if any), and the name of the person we should contact to verify points, premiums, and other program details. If you have questions, call Hayden HeadStart at 800-343-1218.

When you've collected enough coupons to qualify for one of the premiums listed in the Hayden HeadStart Catalog, send the order blank in the catalog together with your coupons and store receipts to:

Hayden Software
Department HeadStart
600 Suffolk Street
Lowell, MA 01854

School Name _____ HeadStart Registration Number: _____

Address _____

City _____ State _____ ZIP _____

If you don't already have a copy of the Hayden HeadStart Catalog, write or call Hayden Software.

To be valid, coupon must be completely filled out and be accompanied by a store receipt. Offer expires April 30, 1985. Offer void where prohibited.
